DEATH PENALTY CASE

ORDER DENYING MOTIONS FOR
TEMPORARY RESTRAINING
ORDER AND PRELIMINARY
INJUNCTION AND FOR EXPEDITED
DISCOVERY

[Docket Nos. 3 & 6]

19 Plaintiff Kevin Cooper moves for a temporary restraining order or preliminary injunction
20 and for expedited discovery. Defendants Richard A. Rimmer, Acting Director of the California
21 Department of Corrections, and Jeanne S. Woodford, Warden of California State Prison at San
22 Quentin, oppose the motions. The Court has read the moving and responding papers and has
23 considered the oral arguments of counsel presented on Thursday, February 5, 2004. For the
24 reasons set forth below, the motions will be denied.

25 **I. BACKGROUND**

26 Plaintiff has been sentenced to death. He is scheduled to be executed by lethal injection
27 just after midnight on Tuesday, February 10, 2004. On Monday, February 2, 2004, Plaintiff filed
28 the present action pursuant to 42 U.S.C. § 1983 (2004). Plaintiff seeks injunctive relief to

Case No. C 04 436 JF

ORDER DENYING MOTIONS FOR TEMPORARY RESTRAINING ORDER AND PRELIMINARY INJUNCTION
AND FOR EXPEDITED DISCOVERY
(DPSAJBDVGGOK)

1 prevent Defendants from executing him pursuant to California's lethal injection protocol because
2 he contends that lethal injection performed pursuant to that protocol inflicts unnecessary pain
3 and torture in violation of his Eighth Amendment right to be free from cruel and unusual
4 punishment.

5 **II. LEGAL STANDARD**

6 As a general rule, a party seeking a preliminary injunction must show either (1) a
7 likelihood of success on the merits and the possibility of irreparable injury or (2) the existence of
8 serious questions going to the merits and the balance of hardships tipping in the movant's favor.
9 See Roe v. Anderson, 134 F.3d 1400, 1401-02 (9th Cir. 1998); Apple Computer, Inc. v. Formula
10 Int'l, Inc., 725 F.2d 521, 523 (9th Cir. 1984). These formulations represent two points on a
11 sliding scale in which the required degree of irreparable harm increases as the probability of
12 success decreases. See Roe, 134 F.3d at 1402.

13 **III. DISCUSSION**

14 **A. Jurisdiction**

15 Defendants contend that Plaintiff should have filed a petition for a writ of habeas corpus
16 pursuant to 28 U.S.C. § 2254 (2004) rather than a civil rights action pursuant to 42 U.S.C. § 1983
17 (2004) to challenge California's lethal injection protocol. The question as to which of these
18 statutes provides the proper means for raising a challenge to a method of execution presently is
19 before the United States Supreme Court in Nelson v. Campbell, cert. granted, 124 S.Ct. 835
20 (2003). However, the United States Court of Appeals for the Ninth Circuit, whose precedent is
21 controlling in this case pending the decision in Nelson, has held that "a challenge to a method of
22 execution may be brought as a § 1983 action." Fierro v. Gomez, 77 F.3d 301, 305-06 (9th Cir.),
23 vacated on other grounds, 519 U.S. 918 (1996). Accordingly, this Court has jurisdiction over
24 Plaintiff's claims pursuant to § 1983.

25 **B. Undue Delay**

26 Although Plaintiff has been seeking review of his conviction and death sentence in state
27 and federal courts for more than a decade, he filed the instant challenge to California's lethal
28

1 injection method of execution only eight days prior to his scheduled execution date. Plaintiff's
2 explanation for the delay, which includes alleged failures in representation by prior counsel,
3 difficulty in securing appointment of new counsel, new counsel's competing responsibilities in
4 preparing a clemency petition and conducting investigations, and an alleged ripeness bar to an
5 earlier presentation of his claims, does not establish cause under applicable law for his failure to
6 raise this challenge at an earlier time. See Gomez v. U.S. Dist. Ct. N.D. Cal., 503 U.S. 653, 653-
7 54 (1992) (holding that a court may consider the last-minute nature of an application to stay
8 execution in deciding whether to grant equitable relief).

9 Although the Court does not doubt the truth of new counsel's representations, it is evident
10 that Plaintiff, who has been and is being assisted by a number of different lawyers and legal
11 organizations, had sufficient legal resources to bring the present action sooner. In the last month
12 alone, the United States Supreme Court has declined to grant or has vacated stays granted to
13 death row inmates filing last-minute challenges to lethal injection. See, e.g., Vickers v. Johnson,
14 No. 03A633, 2004 WL 168080 (U.S. Jan. 28, 2004) (stay of execution denied); Zimmerman v.
15 Johnson, No. 03A606, 2004 WL 97434 (U.S. Jan. 21, 2004) (same); Beck v. Rowsey, 124 S.Ct.
16 980 (Jan. 8, 2004) (stay of execution vacated). Absent a compelling justification for bringing
17 this action at the eleventh hour, such as a material change in the applicable law or factual
18 circumstances or an exceptionally strong showing on the merits, this Court may not simply
19 ignore such clear guidance from the Supreme Court. Moreover, such challenges inappropriately
20 force the Court to make an otherwise unnecessary choice between orderly consideration of the
21 plaintiff's claims and "the state's interest in the finality of convictions that have survived direct
22 review in the state court system." See Calderon v. Thompson, 523 U.S. 538, 555 (1998).¹

23
24
25 ¹While the stated objective of the present action is to address alleged deficiencies in
26 California's lethal injection protocol, the timing of its filing reasonably suggests that an equally
27 important purpose of the action is to stay Plaintiff's execution so that Plaintiff may continue to
28 pursue claims going to the validity of his conviction.

C. Merits

The Eighth Amendment prohibits punishments involving “unnecessary and wanton infliction of pain,” Estelle v. Gamble, 429 U.S. 97, 103 (1976) (internal quotation marks and citations omitted), or that are inconsistent with “evolving standards of decency that mark the progress of a maturing society,” id. at 102 (internal quotation marks and citations omitted). Punishments involving “torture or a lingering death” violate the Eighth Amendment, In re Kemmler, 136 U.S. 436 (1890), and when analyzing a particular method of execution, it is appropriate to focus “on the objective evidence of the pain involved,” Fierro, 77 F.3d at 306 (citing Campbell v. Wood, 18 F.3d 662, 682 (9th Cir.), cert. denied, 511 U.S. 1119 (1994) (concluding that hanging, when conducted under the state of Washington’s protocol, did not constitute cruel and unusual punishment)).

Plaintiff maintains that the three-drug protocol² used for executions in California will subject him to an unreasonable risk of unnecessary pain. Specifically, Plaintiff alleges that the use of the paralytic agent pancuronium bromide (the second drug administered, also known as Pavulon) is inhumane. According to Plaintiff and his experts, Pavulon prevents movement and thus prevents observers from knowing whether the condemned person is experiencing great pain. Plaintiff also alleges that the anesthesia used in execution, sodium pentothal, is short-acting and unreliable. Finally, Plaintiff alleges that the protocol as a whole is vague and without adequate safeguards, pointing to previous executions in which prisoners may have died a painful death.

Even if Plaintiff’s delay in bringing this action were to be ignored or excused, this Court would find and conclude that Plaintiff has not met his burden of demonstrating either the likelihood of success on the merits or the existence of serious questions going to the merits. While thirty-seven states and the federal government authorize lethal injection as a method of execution, not a single court has held that lethal injection violates the Eighth Amendment. To

²Stated simply, the protocol involves the administration of an anesthetic intended to render the prisoner unconscious, followed by a paralytic to prevent involuntary movement, followed by potassium chloride, which stops the prisoner’s heart.

1 the contrary, every state and federal court that has considered the issue has concluded that lethal
2 injection is constitutional. See, e.g., LaGrand v. Lewis, 883 F. Supp. 469, 470-71 (D. Ariz.
3 1995) (citing cases), aff'd, 133 F.3d 1253 (9th Cir.), cert. denied, 525 U.S. 971 (1998); People v.
4 Snow, 65 P.3d 749, 800-01 (Cal.), cert. denied, 1245 S.Ct. 922 (2003); Poland v. Stewart, 117
5 F.3d 1094, 1105 (9th Cir. 1997), cert. denied, 523 U.S. 1082 (1998) (finding petitioner had failed
6 to demonstrate that Arizona's lethal injection protocol would violate his constitutional rights).³

7 Further, at least two courts that have examined lethal injection protocols that, like
8 California's, include the use of both sodium pentothal and Pavulon have held on a fully-
9 developed record that such protocols are constitutional. See State v. Webb, 750 A.2d 448, 453-
10 57 (Conn.), cert. denied, 521 U.S. 835 (2000); Sims v. State, 754 So.2d 657 (Fla.), cert. denied,
11 528 U.S. 1183 (2000). Defendants' expert also has declared that in light of the large dose of
12 sodium pentothal administered pursuant to California's protocol there is only "approximately a
13 0.00006% probability that [a] condemned inmate given [the dose] would be conscious, and able
14 to experience pain, after a period of five minutes." Defs' Ex. C at 3.

15 Nor has Plaintiff met his burden of showing that the use of Pavulon is inhumane and
16 unnecessary. According to Defendants and their experts, a principal purpose of Pavulon is to
17 stop an inmate's breathing. Plaintiff has not articulated a compelling argument that this is not a
18 legitimate state interest in the context of an execution.

19 Finally, Plaintiff's argument that the lethal injection protocol used in California is
20 unconstitutionally vague does not present a serious question going to the merits. "Written
21 procedures are not constitutionally infirm simply because they fail to specify in explicit detail the
22 execution protocol." LaGrand, 883 F.Supp. at 470.

23 While opponents of the death penalty understandably argue that no method of execution
24 can be humane, there is ample legal authority that lethal injection also "comports with current
25 societal norms" regarding execution. Id. at 471. As noted, virtually all states and the federal

26
27 ³See also Defs.' Opp'n App. T.R.O. at 13, n.8, and cases cited therein.

1 government utilize lethal injection as a means of execution. Legislative trends towards imposing
2 a particular punishment are relevant evidence of whether a punishment is cruel and unusual.
3 Fierro, 77 F.3d at 306 n.4 (citing Trop v. Dulles, 356 U.S. 86, 102 (1958) (plurality opinion)).

4 In sum, Plaintiff has done no more than raise the possibility that California's lethal-
5 injection protocol unnecessarily risks an unconstitutional level of pain and suffering. As he has
6 neither demonstrated the likelihood of success on the merits nor serious questions going to the
7 merits, he is not entitled to injunctive relief.⁴

8 IV. DISPOSITION

9 Any case involving the death penalty inevitably raises serious moral, ethical, and legal
10 questions about which people of good will continue to disagree. In Plaintiff's case there also
11 appear to be questions concerning the underlying conviction that have been and continue to be
12 the subject of impassioned debate. The present case, however, concerns the discrete question of
13 whether Plaintiff has met the legal standard for enjoining California's use of lethal injection as a
14 method of execution. Because the Court finds and concludes that Plaintiff has not met this
15 standard and has delayed unduly in asserting his claims, and good cause therefor appearing, IT IS
16 HEREBY ORDERED:

- 17 (1) Plaintiff's motion for a temporary restraining order or preliminary injunction is
18 DENIED;
19 (2) Plaintiff's motion for expedited discovery is DENIED as moot.

20
21 DATED: February 6, 2004

/s/ (electronic signature authorized)

JEREMY FOGEL

United States District Judge

22
23
24
25 ⁴Given the stark finality of the death penalty, there can be no question that Plaintiff will
26 suffer irreparable injury in the absence of injunctive relief. However, in the Ninth Circuit, "even
27 if the balance of hardships tips decidedly in favor of the moving party, it must be shown as an
28 irreducible minimum that there is a fair chance of success on the merits." Johnson v. California
State Bd. Of Accountancy, 72 F.3d 1427, 1430 (9th Cir. 1995).

On Behalf of Petitioner
Donald J. Beardslee

TWENTY-SEVENTH CLAIM FOR RELIEF

The Use of Lethal Gas as a Method of Execution Constitutes Cruel and Unusual Punishment in Violation of Petitioner's Eighth and Fourteenth Amendment Rights.

183. Petitioner incorporates and realleges the allegations of Paragraphs 1-254.¹⁰⁴

184. Petitioner's sentence violates the Eighth and Fourteenth Amendments to the United States Constitution because California's option of execution by lethal gas constitutes cruel and unusual punishment.

185. Petitioner alleges the following facts, among others to be presented after full investigation, discovery and evidentiary hearing, in support of this claim:

a. California Penal Code §§3604(a) and (b) provide, in relevant part, that:

The punishment of death shall be inflicted by the administration of a lethal gas or by an intravenous injection of a substance or substances in a lethal quantity sufficient to cause death . . . If a person under sentence of death does not choose either lethal gas or lethal injection, . . . the penalty of death shall be imposed by lethal gas.

b. Petitioner was expressly sentenced to die by means of lethal gas.

¹⁰⁴ Petitioner recognizes that Judge Patel of the Federal District Court for the Northern District of California has already ruled that death by lethal gas is unconstitutional. Petitioner understands that this ruling has been recently affirmed by the Ninth Circuit Court of Appeals. However, Petitioner is also informed and believes that the State is appealing the Ninth Circuit's decision. Therefore, this claim is raised in an abundance of caution in order to exhaust all claims and pursuant to the requirements of McCleskey v. Zant, 499 U.S. 467, 111 S.Ct. 1454 (1991).

c. The use of lethal gas is unusual in that, for over a decade no state has adopted the lethal gas method and in the past fifteen years at least eight states have abandoned the use of gas as a means for execution.

d. The use of lethal gas as a means of execution is cruel and offends the dignity of every human being. Death by cyanide gas as administered in California occurs by gradual asphyxiation of the prisoner and involves protracted and extreme physical pain over a span of ten to twelve minutes. During this time cyanide pellets dropped into a bath of sulfuric acid produce the lethal gas, which mixes with the nontoxic air in the death chamber. As the condemned prisoner breathes, gradually increasing amounts of lethal gas are inhaled and begin to destroy his or her lungs. During this process, the prisoner begins to suffocate, triggering a reaction of panic, terror and a claustrophobic sensation as the prisoner attempts simultaneously to avoid breathing the poisonous fumes while seeking to breathe fresh air. The ensuing feeling of suffocation and the grip of the straps holding the prisoner's body in the death chair causes the condemned prisoner to thrash hysterically against the restraints. While still conscious and enduring the burning of cyanide gas in his or her lungs, the prisoner loses control of bodily functions, often urinating, defecating and vomiting. The grotesque, inhumane and horrifying suffering inflicted on a person through execution by lethal gas is so shocking to the conscience and dignity of civilized society that the

state consistently resists permitting juries and the public at large from receiving such information. Evidence of the details of an execution is judicially recognized as likely to prevent a jury from imposing death irrespective of the gravity of the crime. People v. Thompson, 45 Cal.3d 86, 139, 246 Cal.Rptr. 245, cert. denied sub nom Thompson v. California, 488 U.S. 960, 109 S.Ct. 404 (1988).

e. The Eighth Amendment prohibits punishments that involve torture, a lingering death, or the unnecessary and wanton infliction of pain and that are unusual because of their infrequent use. Death by lethal gas is such a punishment.

f. Subjecting Petitioner to death by lethal injection also constitutes cruel and unusual punishment violative of his Eighth and Fourteenth Amendment rights.¹⁰⁵

This claim is presented to this Court without substantial delay and is timely for the reasons set forth in Section V.A. of this Petition, supra. Even if this Court is inclined to rule that the claim is untimely, this Court should still reach the merits of the claim for the reasons set forth in Sections V.B. and V.C. of this Petition, supra.

¹⁰⁵ Petitioner acknowledges that this claim appears not to have a valid legal basis under existing case law but would be validated by changes in existing law that Petitioner feels are warranted. This claim is raised pursuant to the requirements of McCleskey v. Zant, 499 U.S. 467, 111 S.Ct. 1454 (1991).

Case No. C-92-3990-SBA

FIRST AMENDED PETITION FOR
WRIT OF HABEAS CORPUS

DEATH PENALTY CASE

1 408. The trial court's instruction to the jury to
2 reach a separate penalty verdict as to each of the two murder
3 counts had a substantial and injurious effect or influence in
4 determining the jury's verdict and rendered the penalty phase of
5 Petitioner's trial unfair and the trial process unreliable.
6 Accordingly, Petitioner's sentence must be overturned and he must
7 be retried.

8 FIFTY-FIRST CLAIM FOR RELIEF

9 The Use of Lethal Gas as a Method of Execution
10 Constitutes Cruel and Unusual Punishment in Violation
11 of Petitioner's Eighth and Fourteenth Amendment Rights.

12 409. Petitioner incorporates and realleges the
13 allegations of Paragraphs 1-490.¹⁸³

14 410. Petitioner's sentence violates the Eighth and
15 Fourteenth Amendments to the United States Constitution because
16 California's option of execution by lethal gas constitutes cruel
17 and unusual punishment.

18 411. Petitioner alleges the following facts, among
19 others to be presented after full investigation, discovery and
20 evidentiary hearing, in support of this claim:

21 a. California Penal Code §§3604(a) and (b)
22 provide, in relevant part, that:

23
24
25 ¹⁸³ Petitioner recognizes that Judge Patel of the Federal
26 District Court for the Northern District of California has
27 already ruled that death by lethal gas is unconstitutional.
28 Petitioner understands that this ruling has been recently
affirmed by the Ninth Circuit Court of Appeals. However,
Petitioner is also informed and believes that the State is
appealing the Ninth Circuit's decision. Therefore, this claim is
raised in an abundance of caution in order to exhaust all claims
and pursuant to the requirements of McCleskey v. Zant, 499 U.S.
467, 111 S.Ct. 1454 (1991).

1 The punishment of death shall be inflicted by
2 the administration of a lethal gas or by an
3 intravenous injection of a substance or
4 substances in a lethal quantity sufficient to
5 cause death . . . If a person under sentence
6 of death does not choose either lethal gas or
7 lethal injection, . . . the penalty of death
8 shall be imposed by lethal gas.

9 b. Petitioner was expressly sentenced to die by
10 means of lethal gas.

11 c. The use of lethal gas is unusual in that, for
12 over a decade no state has adopted the lethal gas method and in
13 the past fifteen years at least eight states have abandoned the
14 use of gas as a means for execution.

15 d. The use of lethal gas as a means of execution
16 is cruel and offends the dignity of every human being. Death by
17 cyanide gas as administered in California occurs by gradual
18 asphyxiation of the prisoner and involves protracted and extreme
19 physical pain over a span of ten to twelve minutes. During this
20 time cyanide pellets dropped into a bath of sulfuric acid produce
21 the lethal gas, which mixes with the nontoxic air in the death
22 chamber. As the condemned prisoner breathes, gradually
23 increasing amounts of lethal gas are inhaled and begin to destroy
24 his or her lungs. During this process, the prisoner begins to
25 suffocate, triggering a reaction of panic, terror and a
26 claustrophobic sensation as the prisoner attempts simultaneously
27 to avoid breathing the poisonous fumes while seeking to breathe
28 fresh air. The ensuing feeling of suffocation and the grip of
 the straps holding the prisoner's body in the death chair causes
 the condemned prisoner to thrash hysterically against the
 restraints. While still conscious and enduring the burning of

1 cyanide gas in his or her lungs, the prisoner loses control of
2 bodily functions, often urinating, defecating and vomiting. The
3 grotesque, inhumane and horrifying suffering inflicted on a
4 person through execution by lethal gas is so shocking to the
5 conscience and dignity of civilized society that the state
6 consistently resists permitting juries and the public at large
7 from receiving such information. Evidence of the details of an
8 execution is judicially recognized as likely to prevent a jury
9 from imposing death irrespective of the gravity of the crime.
10 People v. Thompson, 45 Cal.3d 86, 139, 246 Cal.Rptr. 245, cert.
11 denied sub nom Thompson v. California, 488 U.S. 960, 109 S.Ct.
12 404 (1988).

13 e. The Eighth Amendment prohibits punishments
14 that involve torture, a lingering death, or the unnecessary and
15 wanton infliction of pain and that are unusual because of their
16 infrequent use. Death by lethal gas is such a punishment.

17 f. Subjecting Petitioner to death by lethal
18 injection also constitutes cruel and unusual punishment violative
19 of his Eighth and Fourteenth Amendment rights.¹⁸⁴

UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF CALIFORNIA
OAKLAND DIVISION

DONALD J. BEARDSLEE,

Petitioner,

v.

ARTHUR CALDERON, Warden,

Respondent.

NO. C-92-3990-SBA

ORDER GRANTING RESPONDENT'S
MOTION FOR PARTIAL SUMMARY
JUDGMENT

I. INTRODUCTION

On September 9, 1999, the Court conducted a hearing on Respondent's motion for summary judgment as to Claims 24-29, 31-32, 35-39, 41-44, 47, 51-55, 57-58, 60-64 and 66. These are the claims as to which no evidentiary hearing has been requested by Petitioner and which have not been previously dismissed by the Court. With these claims now resolved, the Court will determine which claims, if any, of remaining Claims 2-14, 16-22, 40, 48-49 and 67 require an evidentiary hearing.

Attorneys Brett Raven and Steven S. Lubliner appeared on behalf of Petitioner and Deputy Attorney General Dane R. Gillette appeared on behalf of Respondent. Based on all papers filed to date, as well as on the oral argument of counsel, the Court finds and orders as follows.

1 which were given in his case, resulting in disparate sentences amongst the defendants
2 and permitting all other defendants to escape a death sentence. No explanation is
3 offered for these differences by Petitioner nor does he allege that varying charges were
4 brought against the co-defendants or that the trials were conducted in any improper
5 manner. Therefore, the allegations raised by Petitioner do not seem to the Court to
6 support his claim that the court system itself is somehow deficient.

7 In any event, in examining Petitioner's case, the Court must review the record
8 and determine whether or not, based on all of the evidence submitted and the jury
9 instructions which were given, Petitioner received a fundamentally fair trial. See
10 Estelle v. McGuire, 502 U.S. 62, 71-72 (1991). The Court has conducted such an
11 analysis and has concluded that Petitioner's constitutional rights were afforded him.
12 Therefore, the Court grants Respondent's motion for summary judgment as to Claim
13 44.

14 2. Claim 51: Lethal Gas Constitutes Cruel and Unusual Punishment

15 Petitioner's fifty-first claim alleges that the method of execution by use of lethal
16 gas constitutes cruel and unusual punishment. California law permits execution by
17 lethal gas or lethal injection. To implement lethal injections, California issued new
18 regulations limiting witness observation of the execution. See California First
19 Amendment Coalition v. Calderon, 150 F.3d 976, 979 (9th Cir. 1998). These
20 regulations have not been shown to be an exaggerated response to prison security and
21 staff safety and therefore have not been shown to violate the First Amendment rights
22 of either the press or the public to view executions. See id. at 7879.

23 California was enjoined from using lethal gas as a method of execution for a
24 short while, see Fierro v. Gomez, 77 F.3d 301 (9th Cir.), vacated on other grounds,
25 117 S. Ct. 285 (1996), but that injunction was ordered vacated due to a change in
26 California law. See Fierro v. Terhune, 147 F.3d 1158, 1160 (9th Cir. 1998). The
27
28

1 voluntary choice of lethal gas as a method of execution waives any claim that the use
2 of lethal gas is unconstitutional. See Stewart v. LaGrand, 119 S. Ct. 1018, 1020
3 (1999) ("To hold otherwise, and to hold that Eighth Amendment protections cannot be
4 waived in the capital context, would create and apply a new procedural rule in
5 violation of Teague v. Lane, 489 U.S. 288 (1989)."). Accordingly, Petitioner may
6 choose to be executed by lethal gas or lethal injection. If he fails to make a choice, he
7 will be executed by lethal injection. If he chooses to be executed by lethal gas, then his
8 claim that such execution method constitutes cruel and unusual punishment is waived.
9 Stewart at 1020.

10 IV. CONCLUSION

11 For the reasons set forth herein, the Court grants Respondent's motion for
12 summary judgment as to Claims 24-29, 31-32, 35-39, 41-44, 47, 51-55, 57-58, 60-64
13 and 66. The Court will next determine which claims, if any, of remaining Claims 2-14,
14 16-22, 40, 48-49 and 67 require an evidentiary hearing. Petitioner's request for an
15 evidentiary hearing as to these claims shall be heard by the Court on October 26, 1999
16 at 10:30 a.m.

15 Attorneys for Plaintiff Kevin Cooper

16 UNITED STATES DISTRICT COURT
17 NORTHERN DISTRICT OF CALIFORNIA
18 SAN FRANCISCO DIVISION
19

20 KEVIN COOPER,
21
22 Plaintiff,

23 v.

24 RICHARD A. RIMMER, Acting Director of
25 the California Department of Corrections;
26 JEANNE WOODFORD, Warden, San Quen-
27 tin State Prison, San Quentin, California,
28 Defendants.

Case No. _____

**COMPLAINT FOR EQUITABLE AND
INJUNCTIVE RELIEF [42 U.S.C.
§ 1983]**

**EXECUTION IMMINENT
Execution Date February 10, 2004
EXPEDITED REVIEW REQUESTED***

The plaintiff, Kevin Cooper, alleges as follows:

NATURE OF ACTION

1. This action is brought pursuant to 42 U.S.C. Section 1983 for violations and threatened violations of the right of the plaintiff to be free from cruel and unusual punishment under the Eighth and Fourteenth Amendments of the United States Constitution. Plaintiff seeks temporary, preliminary and permanent injunctive relief to prevent the defendants from executing plaintiff via means of lethal injection, as that method of execution currently is used in California. Plaintiff's contentions are that lethal injection, as performed in California, inflicts unnecessary

COMPLAINT FOR EQUITABLE
AND INJUNCTIVE RELIEF

1 pain and torture through the use of a paralytic agent that acts as a chemical veil over the process,
2 disguising the agony to be suffered by him. Plaintiff further contends that the absence of many
3 standard medical procedures, and the use of un-approved, untested and unnecessarily risky proce-
4 dures during lethal injection, so elevate the risk of pain and torture, and have actually inflicted
5 such pain and torture in the past, that it is certain he will suffer the same fate unless and until
6 California's Department of Corrections adopts a humane and safe execution protocol.

7 **JURISDICTION, VENUE AND INTRADISTRICT ASSIGNMENT**

8 2. This Court has jurisdiction over this action pursuant to 28 U.S.C. Section
9 1331 (federal question jurisdiction), Section 1343 (civil rights violation), Section 2201 (declara-
10 tory relief), Section 2202 (further relief). This action arises under the Eighth and Fourteenth
11 Amendments to the United States Constitution and under 42 U.S.C. Section 1983.

12 3. Venue is proper pursuant to 28 U.S.C. Section 1391(b), in that the plaintiff
13 is currently incarcerated in San Quentin State Prison in San Quentin, California, located in this
14 District. All executions conducted by the State of California ("State") occur at San Quentin. As
15 this complaint alleges causes of action related to such executions, the events giving rise to this
16 complaint will occur in this District.

17 **THE PARTIES**

18 4. Plaintiff Kevin Cooper is a United States citizen and a resident of the State.
19 He is currently a death-sentenced inmate under the supervision of the California Department of
20 Corrections, C-65304. He is held in San Quentin State Prison, San Quentin, California 94974.

21 5. Defendant Richard A. Rimmer is the Acting Director of the California De-
22 partment of Corrections.

23 6. Defendant Jeanne Woodford is the Warden of San Quentin State Prison
24 where the plaintiff is incarcerated and where his execution is scheduled to occur.

25 **GENERAL ALLEGATIONS**

26 7. The State has scheduled execution for February 10, 2004. State officials
27 have announced that they will commence with the execution at 12:01 a.m.

28 8. The State intends to execute plaintiff by poisoning him with a lethal com-

1 bination of three chemical substances: sodium pentothal (a short-acting barbiturate); pan-
2 curonium bromide (a curare-derived agent that paralyzes all skeletal or voluntary muscles, but
3 which has no effect whatsoever on awareness, cognition, or sensation); and potassium chloride
4 (an extraordinarily painful chemical that activates the nerve fibers lining the inmate's veins and
5 which can interfere with the rhythmic contractions of the heart and cause cardiac arrest).

6 9. The California Department of Corrections ("CDC") protocol by which le-
7 thal injection executions are performed violates numerous constitutional and statutory provisions
8 designed to prevent cruelty, pain and torture, and thus petitioner may not be executed under its
9 current provisions.

10 10. The CDC adopted the present protocol without any of the standard and
11 well-accepted medical research and review. The procedures are ad-hoc procedure cobbled to-
12 gether without any consultation, review or regular vetting, and with no assistance by the medical
13 community. Unqualified and untrained personnel are determining the procedure based solely on
14 a version initially adopted in Oklahoma, then applied somewhat differently in Texas, and only
15 because a previous at Warden of San Quentin observed an execution in Texas, without any regu-
16 lar and appropriate input from or consultation with medical personnel. The result has been an in-
17 creasingly dangerous procedure, with the last execution providing a graphic example of the
18 results of this institutional neglect.

19 11. The particular combination of chemicals, and the absence of standardized
20 procedures and qualifications of the personnel involved, will cause plaintiff consciously to suffer
21 an excruciatingly painful and protracted death, as has happened to three of the four previous exe-
22 cutions for which some records are available, and in the last execution of Stephen Anderson.

23 12. Sodium pentothal is an ultra-short-acting barbiturate that is ordinarily ad-
24 ministered only during the induction phase of anesthesia, so that the patient may re-awaken and
25 breathe unassisted if any complications arise. Because of its brief duration, there is a reasonable
26 likelihood that sodium pentothal may not provide a sedative effect throughout the entire execution
27 process. Without adequate sedation, plaintiff will experience excruciating pain during the execu-
28 tion process.

1 13. The second chemical involved in the lethal injection process, pancuronium
2 bromide, is a derivative of curare that acts as a neuromuscular blocking agent. While pan-
3 curonium bromide paralyzes skeletal muscles, including the diaphragm, it has no effect on con-
4 sciousness or the perception of pain and suffering. This paralytic chemical (pancuronium
5 bromide) is completely unnecessary and serves only to mask the excruciating pain of the plaintiff.

6 14. The risk of inflicting severe and unnecessary pain and suffering upon plain-
7 tiff in the lethal injection process is particularly grave because California's procedures and proto-
8 cols do not include medically-required and appropriate safeguards. There are no standardized
9 time of administration requirements for each of the chemicals; the protocol does not contain
10 safeguards regarding the manner in which the execution is to be carried out; it does not establish
11 the minimum qualifications and expertise required of the personnel performing the critical tasks
12 in the lethal injection procedure; and, there is no appropriate criteria and standards that these per-
13 sonnel must rely upon in exercising their discretion during the lethal injection procedures. The
14 California protocol has no contingency plan in place if petitioner requires medical assistance, and
15 actually contains provisions which will counteract the intended sedation.

16 **COUNT I**

17 **VIOLATION OF RIGHT TO BE FREE FROM CRUEL AND UNUSUAL**
18 **PUNISHMENT (EIGHTH AND FOURTEENTH AMENDMENTS)**

19 **(42 U.S.C. § 1983)**

20 15. Plaintiff realleges and incorporates by reference the allegations contained
21 in paragraphs 1 through 14.

22 16. Defendants Richard A. Rimmer and Jeanne Woodford are acting under
23 color of California law or causing to be administered to plaintiff chemicals that will cause unnec-
24 essary pain in the execution of a sentence of death, thereby depriving plaintiff of his rights under
25 the Eighth and Fourteenth Amendments to be free from cruel and unusual punishment, in viola-
26 tion of 42 U.S.C. Section 1983.

27 17. The California Department of Correction's lethal injection protocol violates
28 plaintiff's rights under the cruel and unusual punishments Clause of the Eighth Amendment be-

1 cause: (a) the protocol does not comport with contemporary norms and standards of society; (b)
2 the protocol offends the dignity of the person and society; (c) the protocol creates the unreason-
3 able and unacceptable risk of unnecessary physical pain; and (d) the protocol creates the unrea-
4 sonable and unacceptable risk of unnecessary psychological pain.

5 18. The California lethal injection protocol utilizes three chemicals without any
6 indications of proper training, experience or expertise on the part of those entrusted with the in-
7 jection procedure. The procedure fails to detail any relative timing protocol for administration of
8 the three chemicals, a necessary requirement for the effective administration of these chemicals.

9 19. The California lethal injection protocol's use of pancuronium bromide is
10 completely unnecessary to execute plaintiff and there is a probability that the use of this chemical,
11 when combined with the initial dose of sodium pentothal, will result in plaintiff being paralyzed
12 but conscious and suffering from death by suffocation, or, worse, the sensations associated with
13 the injection of potassium chloride: burning veins and heart failure. The sole purpose for the use
14 of pancuronium is to impose a chemical camouflage on the process and thereby hide the pain and
15 suffering by the inmate. For this very reason the use of pancuronium bromide has been banned in
16 the euthanasia of animals.

17 20. The sedative agent utilized in the California procedure, sodium pentothal,
18 is an ultra-fast acting barbiturate that must be carefully administered and monitored if it is to have
19 the desired effect of rendering the inmate unconscious sufficiently to apply the remaining chemi-
20 cals without causing extreme pain and suffering. The California procedure fails to apply proper
21 administration and monitoring mechanisms to ensure this.

22 21. The California procedure fails to address the likely differences among the
23 inmate population in body type, drug history, medical condition and history. Each of these dif-
24 ferences must be considered when determining the propriety of the lethal injection procedure and
25 its ability to adequately sedate plaintiff. None have been so considered. The California proce-
26 dure allows the administration of Valium close in time to the execution, which will cause compli-
27 cations in the ability of the sedative agent to have the full and desired effect.

28 22. There is no adequate description of the training, credentials, certifications,

1 experience or proficiency of any prison employee, nurse or paramedic in the administration of the
2 lethal injection procedure, an admittedly complex medical event that requires a great deal of care,
3 training and expertise. For instance, there is nothing in the procedure that would require someone
4 with sufficient expertise to determine if blockage is present in the intravenous line. If such a
5 block is present, and is not attended to immediately and properly, plaintiff will experience the ag-
6 ony of death by conscious suffocation or the suffering associated with death by potassium chlo-
7 ride, both of which are extremely painful and inhumane.

8 23. The California procedure fails to address any reasonably foreseeable com-
9 plications with any appropriate medical response. If California is using the "cut-down" procedure
10 utilized by the states it emulates, that process requires a sufficient training and experience, and
11 medical licensing, none of which are contained within California's protocols.

12 24. Plaintiff's contentions are supported by official Department of Corrections
13 records. Of California's recorded lethal injections, at least three were such that it is probable that
14 the inmates suffered an inhumane and excruciating death. In the case of Stephen Anderson's
15 execution, the last one in California, observations were consistent with Mr. Anderson being insuf-
16 ficiently sedated and suffering unnecessarily and painfully.

17 COUNT II

18 VIOLATION OF RIGHT TO DUE PROCESS (FOURTEENTH AMENDMENT)

19 (42 U.S.C. § 1983)

20 25. Plaintiff realleges and incorporates by reference the allegations contained
21 in paragraphs 1 through 24.

22 26. The CDC's lethal injection protocol violates plaintiff's rights under the due
23 process clause of the Fourteenth Amendment of the United States Constitution, because the pro-
24 tocol was improperly formulated outside of the public's eye pursuant to arbitrary procedures, has
25 never been reviewed by any legislative body or any public representative and calls for the arbi-
26 trary use of a neuromuscular blocking agent, pancuronium bromide (aka "Pavulon"), which
27 serves no legitimate purpose and chemically veils the process.

28 27. The CDC's lethal injection protocol is illegal under applicable mandatory

1 administrative provisions contained in California statutes and regulations, and thereby violates
2 plaintiff's fundamental constitutional rights and rights to due process of law under the Fourteenth
3 Amendment for the following reasons:

4 (a) The lethal injection protocol was promulgated in violation of the
5 California Administrative Procedures Act , made expressly applicable to the CDC pursuant to Pe-
6 nal Code Section 5058;

7 (b) The lethal injection protocol, in providing for the use of the neuro-
8 muscular blocking agent Pavulon, which is strictly prohibited for use in euthanizing non-livestock
9 animals, violates California statutory and regulatory law prohibiting cruelty to animals, including
10 Penal Code Sections 597 and 599b, Business and Professions Code Sections 4800-917 (the Vet-
11 erinary Medicine Practice Act), Office of the Attorney General of the State of California, Opinion
12 01-103 (January 2, 2002) (adopting the 1993 Report of the American Veterinary Medical Asso-
13 ciation Panel of Euthanasia as the proper standard in California for measuring whether an animal
14 euthanasia procedure causes "unnecessary or unjustifiable physical pain or suffering" within the
15 meaning of section 599b);

16 (c) The lethal injection procedures, in providing for the practice of
17 medicine and provision of healthcare services by unlicensed and uncertified persons, violates
18 California's Medical Practice Act and the statutes and regulations governing the practice of such
19 services in the state, and further violates the equal protection clauses of the state and federal con-
20 stitutions by requiring absolutely no training for those who execute humans, but mandating rigor-
21 ous training under Business and Professions Code Section 4827(d) and Section 2039 of Title 16
22 of the California Code of Regulations for those non-medical personnel who administer euthanasia
23 to pets;

24 (d) The lethal injection procedures, in providing for the unregulated
25 handling and administration of controlled substances, including sodium pentothal, a Schedule III
26 controlled substance, violates the California Uniform Controlled Substances Act, and regulations
27 promulgated thereunder.

28 28. Plaintiff has a liberty interest guaranteed by these provisions of California

1 law and which is protected by the due process clause of the Fourteenth Amendment.

2 **COUNT III**

3 **VIOLATION OF RIGHTS TO HAVE ACCESS TO THE COURTS AND OTHER**
4 **REMEDIES TO PROTECT THE RIGHT TO BE FREE FROM CRUEL AND UNUSUAL**
5 **PUNISHMENT (FIRST, EIGHTH AND FOURTEENTH AMENDMENTS)**

6 (42 U.S.C. § 1983)

7 29. Plaintiff realleges and incorporates by reference the allegations contained
8 in paragraphs 1 through 28.

9 30. The CDC's lethal injection protocol violates the plaintiff's rights protected
10 under the First, Eighth and Fourteenth Amendments of the United States Constitution, to have
11 access to the courts and other remedies to protect plaintiff's right not to be subjected to cruel and
12 unusual punishment because the protocol requires the use of Pavulon, which creates a chemical
13 veil over the execution.

14 31. The right to a public viewing of the execution so that it can be determined
15 whether or not plaintiff suffered an inhumane execution is effectively masked by the unnecessary
16 and inherently risky use of pancuronium bromide in the doses contained in California's protocol.
17 This chemical veil is the equivalent of a curtain being placed over the execution chamber that
18 eliminates review of the process and its effect.

19 32. Pancuronium paralyzes all voluntary muscles, but does not affect sensation,
20 consciousness, cognition, or the ability to feel pain and suffocation. Pancuronium bromide is a
21 neuromuscular blocking agent. Its effect is that it renders the muscles unable to contract but it
22 does not affect the brain or the nerves. It is used in surgery to ensure that there is no movement
23 and that the patient is securely paralyzed so that surgery can be performed without contraction of
24 the muscles. There is no reason for the application of this drug other than to mask the effects of
25 the other chemicals used in the injection process.

26 **PRAYER FOR RELIEF**

27 WHEREFORE, Kevin Cooper prays for:

28 1. Temporary, preliminary and permanent injunctive relief against the defen-
dants, their officers, agents, servants, employees and all persons acting in concert with them, that

1 enjoins the defendants from executing plaintiff by lethal injection using the chemicals and under
2 the procedures in effect;

3 2. Reasonable attorneys' fees pursuant to 42 U.S.C. Section 1983 and the laws
4 of the United States;

5 3. Costs of suit; and

6 4. Any such other relief as the Court deems just and proper.

**PLAINTIFF'S MOTION FOR TRO AND
PRELIMINARY INJUNCTION**

1 the Department of Corrections consulted with other prison officials to create Procedure No. 770,
2 the guideline governing lethal injection executions in California. The California lethal injection
3 procedure utilizes a combination of a barbiturate sedative (sodium pentothal), a neuromuscular
4 blocking agent (pancuronium bromide), and a chemical that stops the heart (potassium chloride).
5 In their haste to create these procedures, however, state officials neglected to consult with medi-
6 cal professionals to ensure that the adopted process ensures a humane method of enforcing Cali-
7 fornia's capital sentencing scheme.

8 As standards of decency evolve and medical information becomes available, the
9 inhumanity of lethal injection, as it is carried out in California, is not in question. In at least three
10 of the eight lethal injection executions, state officials failed to follow their protocol, resulting in
11 excruciating pain for the condemned inmates. The descriptions and reports of the Bonin, Siri-
12 pongs and Anderson executions all contain details of behaviors and responses consistent with in-
13 adequate sedation and excruciating pain. In particular, the Anderson execution was occasioned
14 by over thirty (30) heaves and pauses and visible evidence that Anderson suffered an agonizing
15 death. Moreover, recent events and the greater availability of medical information as more lethal
16 injection executions take place throughout the country reveal that even when the protocol is fol-
17 lowed correctly, the person to be executed is paralyzed, but experiences extreme and unnecessary
18 pain for several minutes. Indeed, although proponents of lethal injection in California have found
19 comfort in the fact that the inmates appear calm and serene during the process, this serenity is ac-
20 tually the result of a chemical veil created by the muscle paralysis, not the absence of excruciating
21 pain.

22 The recent medical controversy surrounding lethal injection executions in other
23 states has given rise to a closer analysis of the process and substances used by the State of Cali-
24 fornia. This inquiry, as documented by the exhibits filed in support of this application, demon-
25 strates the significant likelihood that Mr. Cooper will experience excruciating pain during his
26 execution. Mr. Cooper thus requests that the Court issue an order enjoining execution by means
27 of lethal injection as it is currently administered in the State of California, and staying Mr. Co-
28

1 per's currently scheduled execution until a more humane method is implemented.¹

2 **II. FACTUAL BACKGROUND**

3 On February 19, 1985, a jury in San Diego County found Kevin Cooper
4 ("Mr. Cooper") guilty of four counts of First Degree Murder (Cal. Penal Code § 187; Counts 2, 3,
5 4 and 5) and one count of Attempted First Degree Murder (Cal. Penal Code §§ 664, 187; Count
6 6). The jury also found that the crimes were committed under special circumstances in that Mr.
7 Cooper committed more than one murder and he inflicted great bodily injury. Cal. Penal Code §
8 190.2(a)(3), 12022.7. On March 1, 1985, the jury returned a finding that Cooper should suffer the
9 penalty of death for these crimes.

10 On December 17, 2003, the Superior Court of San Diego issued a death warrant
11 under California Penal Code section 1227. The court ordered Cooper to "suffer the death penalty,
12 and that said penalty shall be inflicted within the walls of the State Prison at San Quentin, Cali-
13 fornia, in the manner and means prescribed by law." The court set Mr. Cooper's execution date
14 for February 10, 2004. Mr. Cooper has declined to elect a form of execution. Thus, under the
15 procedures of this State, Mr. Cooper is scheduled to die by means of lethal injection. Cal. Penal
16 Code § 36034; *Fierro v. Gomez*, 865 F. Supp. 1387 (N.D. Cal. 1994), *aff'd*, *Fierro v. Gomez*, 77
17 F.3d 301 (9th Cir. 1996), *reversed on other grounds*, *Gomez v. Fierro*, 519 U.S. 918 (1996).

18 Unless executive clemency or a stay of execution is issued, Mr. Cooper's execution
19 will be conducted under the authority of San Quentin Operational Procedure No. 770 ("Procedure
20 No. 770"), the protocol that sets forth the "procedure for the care and treatment of inmates from
21

22
23 ¹ The United States Supreme Court recently granted certiorari to address a challenge to
24 Alabama's lethal injection procedures. Condemned inmate David Larry Nelson ("Nelson")
25 brought an action under 42 U.S.C. Section 1983 challenging Alabama's intention to use a cut-
down procedure to gain venous access under the Eighth Amendment.

26 On December 1, 2003, the Supreme Court stayed Nelson's execution and granted his peti-
27 tion for a writ of certiorari on the following question: "[w]hether a complaint brought under 42
28 U.S.C. Sec. 1983 by a death-sentenced state prisoner, who seeks to stay his execution in order to
pursue a challenge to the procedures for carrying out the execution, is properly recharacterized as
a habeas corpus petition under 28 U.S.C. Sec. 2254?" *Nelson v. Campbell*, 2003 U.S. LEXIS
8577 (2003).

1 the time an execution date is set through execution by lethal injection."² (Declaration of John R.
2 Grele in support hereof ["Grelé Decl."] ¶ 2, Ex. A, Section II.) The lethal injection procedure is
3 summarized on the California Department of Corrections website at [http://www.cdcr.state.ca.us/](http://www.cdcr.state.ca.us/issues/capital/capital4.htm)
4 [issues/capital/capital4.htm](http://www.cdcr.state.ca.us/issues/capital/capital4.htm) (the "Lethal Injection Website"). (Grelé Decl. ¶ 5, Ex. D.) Procedure
5 No. 770 and the Lethal Injection Website contain the only official guidelines for the prison War-
6 den and execution team in carrying out Mr. Cooper's execution.

7 **III. ARGUMENT**

8 **A. Defendants' Conduct Is Actionable Under Section 1983**

9 **1. A Challenge to a Method of Execution Is Properly Brought** 10 **as a Section 1983 Claim**

11 In this circuit, challenges to a method of execution are properly considered as sec-
12 tion 1983 claims. *Fierro v. Gomez*, 77 F.3d 301, 306 (9th Cir. 1996), *opinion vacated on other*
13 *grounds*, 519 U.S. 918 (1996). The State of California in *Fierro* argued that challenges to a
14 method of execution could only be brought through a petition for writ of habeas corpus. *Id.* at
15 302. As explained by this Court, a petition for writ of habeas corpus properly involves a chal-
16 lenge by an inmate to the constitutionality of his conviction or sentence. *Id.* at 304 (citing *Preiser*
17 *v. Rodriguez*, 411 U.S. 475, 489-90 (1973)). A challenge to a means of execution, however,
18 seeks a review of the method by which sentences are carried out, rather than a review of the ac-
19 tual death sentence itself. *Fierro* at 304. Accordingly, "a challenge to the method by which an
20 inmate sentenced to death will be executed may be brought pursuant to § 1983." *Id.* at 306.

21 **2. 42 U.S.C. Section 1983 Provides Redress for Violations of** 22 **the Eighth and Fourteenth Amendments**

23 42 U.S.C. section 1983 provides, in relevant part, for the protection of "any rights,
24 privileges, or immunities secured by the Constitution and laws" against infringement by the
25

26 ² Mr. Cooper has obtained a redacted copy of Procedure No. 770. This memoran-
27 dum addresses only the deficiencies in Procedure No. 770 as observed from the partial copy
28 available to Mr. Cooper. Mr. Cooper is filing herewith a request for production of documents and
things and a notice of deposition in order to obtain information, including a complete and unre-
dacted version of Procedure No. 770 necessary to properly present this claim.

1 states. 42 U.S.C. § 1983. When these rights are violated, section 1983 creates an action for dam-
2 ages and injunctive relief for the benefit of "any citizen of the United States" against the state ac-
3 tor responsible for the violation. In accordance with the remedial nature of the statute, the
4 coverage of section 1983 must be "liberally and beneficially construed." *Dennis v. Higgins*, 498
5 U.S. 439, 443 (1991) (quoting *Monell v. New York City Dept. of Social Services*, 436 U.S. 658,
6 684 (1978)). The United States Supreme Court has, therefore, "given full effect to [the statute's]
7 broad language" by recognizing that section 1983 provides a remedy "against all forms of official
8 violation of federally protected rights." *Id.* at 444.

9 Mr. Cooper's allegations as described in full detail below raise violations of rights
10 afforded to him by the Eighth and Fourteenth Amendments to the United States Constitution,
11 provisions for which section 1983 provides a remedy. *See Farmer v. Brennan*, 511 U.S. 825
12 (1994); *Estelle v. Gamble*, 429 U.S. 97 (1976).

13 3. **This Court Has Authority to Grant Injunctive Relief Under**
14 **the Circumstances Raised in Mr. Cooper's Complaint**

15 Under section 1983, a court may grant equitable relief for violations of the federal
16 Constitution and laws. In the Ninth Circuit, a party seeking a preliminary injunction must meet
17 one of two tests. Under the first test, a court may issue a preliminary injunction where it finds:
18 (1) a substantial likelihood that plaintiff will prevail on the merits; (2) a substantial threat that
19 plaintiff will suffer irreparable injury if the injunction is not granted; (3) that the threatened injury
20 to plaintiff outweighs the threatened harm the injunction may do to defendant; and (4) that grant-
21 ing the preliminary injunction will not disserve the public interest. *Martin v. International Olym-*
22 *pic Comm.*, 740 F.2d 670, 674-75 (9th Cir. 1984) (citing *William Inglis & Sons Baking Co. v. ITT*
23 *Continental Baking Co.*, 526 F.2d 86, 87 (9th Cir. 1975)). Under the second test, a court may is-
24 sue a preliminary injunction if the moving party demonstrates either: (1) a combination of prob-
25 able success on the merits and the possibility of irreparable injury; or (2) that serious questions
26 are raised and the balance of hardships tips heavily in the moving party's favor. *Martin*, 750 F.2d
27 at 675. The purpose of a preliminary injunction is to preserve the *status quo* pending the outcome
28 of litigation. *Regents of the Univ. of California v. ABC, Inc.*, 747 F.2d 511, 514 (1984).

3

1

5

1 infliction of unnecessary pain in carrying out a death sentence. *Louisiana ex rel. Francis v. Re-*
2 *sweber*, 329 U.S. 459, 463 (1947) (Reed, J, opinion.); *Fierro*, 865 F. Supp. at 1413. Further,
3 "[p]unishments are cruel when they involve . . . a lingering death." *In re Kemmler*, 136 U.S. 436,
4 447 (1890). A punishment is particularly constitutionally offensive if it involves *foreseeable* in-
5 fliction of suffering. *Furman v. Georgia*, 408 U.S. 238, 273 (1973) (citing *Resweber*, 329 U.S. at
6 463) (concluding that had failed execution been intentional and not unforeseen, punishment
7 would have been, like torture, "so degrading and indecent as to amount to a refusal to accord the
8 criminal human status").

9 The United States Supreme Court, in determining whether a method of execution
10 violates the Eighth Amendment prohibition against cruel and unusual punishment examines
11 whether the method of execution: (1) comports with contemporary norms and standards of soci-
12 ety; (2) offends the dignity of the person and society; (3) inflicts unnecessary physical pain; and
13 (4) inflicts unnecessary psychological suffering. *See Weems v. United States*, 217 U.S. 349
14 (1910); *see also In re Kemmler*, 136 U.S. at 447 (punishment is unconstitutional if it inflicts "un-
15 necessary pain, undue physical violence, or bodily mutilation and distortion"). Throughout this
16 country's history, the courts have addressed different methods for carrying out the death penalty.
17 Over the years, practices once found humane have later been declared unconstitutional.³ Such
18 evolution in the courts' opinions of execution methods is a reflection of the fact that the Eighth
19 Amendment in its prohibition of cruel and unusual punishment has been interpreted in a "flexible
20 and dynamic manner." *Gregg v. Georgia*, 428 U.S. 153, 171 (1976). As the Court consistently
21 has recognized, the Eighth Amendment draws its meaning not from an inherent sense of right and
22 wrong, but from "the evolving standards of decency that mark the progress of a maturing soci-
23 ety." *Trop v. Dulles*, 356 U.S. 86, 101 (1958).

24 Recently in California, a closer examination of execution by lethal gas led the
25

26 ³ In the late 19th century, the United States Supreme Court cited drawing and quartering,
27 as well as public dissection, as examples of unnecessary cruelty that violated the Eighth Amend-
28 ment. *Wilkerson v. Utah*, 99 U.S. 130, 135-36 (1879). A year later, the Court added burning at
the stake, crucifixion, and breaking on the wheel to the list of unconstitutional methods of execu-
tion. *In re Kemmler*, 136 U.S. at 446.

1 Ninth Circuit to declare that method unconstitutional. *Fierro*, 865 F. Supp. 1387. Developed in
2 1937, the gas chamber was once viewed by society as a humane means of execution. Years of
3 "history and moral development," however, changed that judgment. *Gomez v. United States Dis-*
4 *trict Court*, 503 U.S. 653, 654-55 (1992) (Stevens, J., dissenting.) As "the concepts of dignity
5 and civility evolve, so too do the limits of what is considered cruel and unusual." *Fierro*, 865 F.
6 Supp. at 1409. In the case of the gas chamber, much of the change in attitude came as a result of
7 the use of cyanide gas in the Holocaust and the development of cyanide agents as chemical weap-
8 ons. *Gomez*, 503 U.S. 653. Fundamentally, however, the change in public opinion came because
9 of increased availability of information concerning the application of the method and a better un-
10 derstanding of the suffering inflicted upon condemned inmates. As with the gas chamber, a
11 closer look at California's lethal injection procedures reveal similar constitutional infirmities.

12 The California Department of Correction's lethal injection protocol violates the
13 Eighth Amendment because it will subject Mr. Cooper to an unreasonable and unacceptable risk
14 of unnecessary physical and psychological pain and involves execution procedures that offend
15 contemporary norms and standards of society. *See generally Atkins v. Virginia*, 536 U.S. 304
16 (2002) and cases cited therein; *see also California First Amendment Coalition v. Woodford*, 299
17 F.3d 868, 876 (9th Cir. 2002) ("To determine whether lethal injection executions are fairly and
18 humanely administered, or whether they ever can be, citizens must have reliable information
19 about the 'initial procedures,' which are invasive, possibly painful and may give rise to serious
20 complications.").⁴

21
22 ⁴ Plaintiff submits as an Exhibit the transcript of the recent hearing conducted in the Ten-
23 nessee capital case of *Abu Ali Abdur'Rahman v. Bredesen*, Tennessee Court of Appeals, Case No.
24 M2003-01767-COA-R3-CV, Trial Transcript (hereinafter "TRT") and requests that this Court
take judicial notice of this transcript. (Grele Decl. ¶ 6, Ex. E.) The question presented in that
case was the constitutionality of the Tennessee Department of Corrections (hereinafter "TDOC")
lethal injection procedures, which mirror those in California.

25 On June 2, 2003, the Tennessee Chancery Court entered a Memorandum and Order, mak-
26 ing certain significant findings that support the position that the lethal injection procedures are
27 unlawful. (Grele Decl. ¶ 7, Ex. F.) The Chancery Court's findings include the following: (a)
28 "[t]he proof established that Tennessee's method [of lethal injection] is not state of the art. It was
developed simply by copying the same method currently in use by some thirty other states. The
method could be updated with second or third generation drugs to, for example, streamline the
number of injections administered" (*id.*, Ex. F at 2); (b) "[m]oreover, the method's use of Pavulon,

1 1. **The Chemicals Used in the Lethal Injection Procedure Pre-**
2 **sent a Risk of Unreasonable Suffering and Cruel and Un-**
3 **usual Punishment.**

4 The California Department of Correction's lethal injection "procedures" provide
5 for the injection of three drugs in the following sequence: sodium pentothal, pancuronium bro-
6 mide, and potassium chloride. The use of each of these drugs under the protocol creates serious
7 risk of an inhumane execution. The second drug, pancuronium bromide, is the most problematic.

8 **a. The Use of Pancuronium Bromide Is Inhumane**

9 Pancuronium bromide, also known by its brand name Pavulon, paralyzes all volun-
10 tary muscles but does not affect sensation, consciousness, cognition, or the ability to feel pain and
11 suffocation. (Declaration of Dr. Mark Heath filed herewith ["Heath Decl."] ¶ 8; Grele Decl. ¶ 6,
12 Ex. E [TRT at 62-63, 111-12.]) Pancuronium bromide is a neuromuscular blocking agent. It op-
13 erates by attaching to the receptor sites in skeletal muscle tissue to prevent or "block" nerve sig-
14 nals from interacting with the muscle tissue. (Grelle Decl. ¶ 6, Ex. E [TRT at 54-55, 111-12].) It
15 therefore renders the muscles unable to contract, but it does not affect the brain or nerves. (Heath
16 Decl. ¶ 10.)

17 Thus, pancuronium bromide does not affect consciousness or the sensation of pain
18 and suffering. It does not block the actual creation of the nerve impulse in the brain, and it does
19 not block the passage of the nerve impulse through the nerve to the endpoint of the nerve fiber.
20 (Grelle Decl. ¶ 6, Ex. E [TRT at 56-57, 111-12.]) It does not affect or diminish the patient's ability

21 a drug outlawed in Tennessee for euthanasia of pets, is arbitrary. The State failed to demonstrate
22 any need whatsoever for the injection of Pavulon" (*id.*); (c) "[s]ignificantly, there was no proof
23 from the State that the Pavulon is necessary to the lethal injection process. No proof was pro-
24 vided by the State for the use of Pavulon in its lethal injection process. The state's expert, Dr.
25 Levy, on cross-examination, testified that he did not know of any legitimate purpose for the use
26 of Pavulon in the Tennessee lethal injection process. He agreed that the injection of Pavulon
27 without anesthesia would be a horrifying experience" (*id.* at 6.); (d) "[b]ut the use of Pavulon is
28 problematic because it is unnecessary. As stated above, the State failed to demonstrate any rea-
son for its use. The record is devoid of proof that the Pavulon is needed. Thus, the Court con-
cludes that, while not offensive in constitutional terms, the State's use of Pavulon is "gilding of
the lily" or, stated in legal terms, arbitrary." (*id.* at 13).

 Despite these findings, the Chancery Court concluded that the Tennessee Department of
Correction's lethal injection protocol does not offend the Constitution. The court based this con-
clusion principally on the contention that most death penalty states use a similar kind of lethal
injection procedure. The decision currently is on appeal to the Tennessee Court of Appeals.

1 to think, to be oriented to where he is, to experience fear or terror, to feel pain, or to hear. All of
2 those cognitive functions are left completely intact in the presence of pancuronium bromide. The
3 only thing that is gone is the ability to move. (Grele Decl. ¶ 6, Ex. E [TRT at 112].)

4 While Pavulon does not affect the heart muscle, it does paralyze the diaphragm
5 and the skeletal muscles in the chest. Accordingly, pancuronium bromide causes asphyxiation or
6 suffocation. (Heath Decl. ¶ 13.)

7 If a person is not properly anesthetized when injected with pancuronium bromide,
8 he will remain conscious while being completely paralyzed. In this state, the person will undergo
9 the terrorizing and excruciating experience of suffocation without the ability to move or to ex-
10 press his pain and suffering. (Heath Decl. ¶¶ 10-11.) This experience is "worse than death."
11 (Grele Decl. ¶ 6, Ex. E [TRT at 112-13, 120, 193-99] [where Carol Weihrer described her own
12 experience of being paralyzed without adequate anesthesia. Ms. Weihrer was being ventilated
13 and therefore did not experience the agony of suffocation].)

14 Pancuronium bromide paralyzes all skeletal muscles including facial muscles and
15 the muscles used to speak and make noises. Thus, pancuronium bromide prevents observers from
16 detecting any signs that the person is experiencing pain and suffering. (Heath Decl. ¶ 15.) The
17 conscious paralyzed person will continue to have the desire to move without being able to do so.
18 Carol Weihrer described the sensation of wanting to move without the ability to do so. "It was
19 the most terrifying, torturous experience you can imagine because you cannot move. I was as
20 alert at that time as I am right now . . . yet I could not alert the surgical team in any way that I was
21 feeling everything. I was completely paralyzed. . . . I just remember using every ounce of my
22 strength to try to move everything and realizing that they could not hear me or see me move any-
23 thing." (Grele Decl. ¶ 6, Ex. E [TRT at 195-96].)

24 If administered alone, a lethal dose of pancuronium would not immediately cause a
25 condemned inmate to lose consciousness. It would totally immobilize the inmate by paralyzing
26 all voluntary muscles and the diaphragm, causing the inmate to suffocate to death while experi-
27 encing an intense, conscious desire to inhale. Ultimately, consciousness would be lost, but it
28 would not be lost as an immediate and direct result of the pancuronium. Rather, the loss of con-

1 sciousness would be due to suffocation, and would be preceded by the torment and agony caused
2 by suffocation. (Heath Decl. ¶ 13.)

3 As Dr. Geiser explained, the use of Pavulon can interfere with an anesthesiologist's
4 ability to monitor the patient's condition and degree of unconsciousness. The use of a neuromus-
5 cular blocking agent requires "more expertise than in the normal anesthetic regimen." (Grele
6 Decl. ¶ 6, Ex. E [TRT at 65-66].) Because of the skeletal muscle relaxation, the patient loses
7 "some of the reflexes that you monitor in order to determine anesthetic depth." It "masks some of
8 the physical parameters that we use to determine anesthetic depth." (*Id.*)

9 Dr. Heath makes the same point: anesthesiologists would never apply Pavulon or
10 any neuromuscular blocking agent before confirming that the patient is properly anesthetized. "I
11 would never give Pavulon without having a high degree of certainty that the patient were anesthe-
12 tized with whatever drug I'm going to use to maintain the anesthesia." (Grele Decl. ¶ 6, Ex. E
13 [TRT at 116].)

14 It is for these reasons that the use of a neuromuscular blocking agent in euthanasia
15 of animals is strictly forbidden by the ethical standards for veterinary medicine. (*Id.* [TRT at 60-
16 62.]) *The 1993 Report of the American Veterinary Medical Association (AVMA) Panel on Eutha-*
17 *nasia* states:

18 For death to be painless and distress-free, unconsciousness should
19 precede loss of motor activity (muscle movement). This means that
20 agents that induce muscle paralysis without unconsciousness are
absolutely condemned as the sole agents for euthanasia.

21 (Grele Decl. ¶ 11, Ex. J.) This same Report later states:

22 A combination of pentobarbital [a commonly used anesthetic and
23 euthanasia agent] with a neuromuscular blocking agent is not an ac-
ceptable euthanasia agent.

24 The 2000 Report of the AVMA Panel on Euthanasia similarly condemns the use of
25 neuromuscular blocking agents in euthanasia either as sole agents or in combination with an anes-
26 thetic. (Grele Decl. ¶ 12, Ex. K.) According to the Report: "A combination of pentobarbital with
27 a neuromuscular blocking agent is not an acceptable euthanasia agent." (*Id.* at 80.) Dr. Geiser
28 explained there is no allowance under the AVMA standards for the use of Pavulon in euthanasia

1 under any set of circumstances. Perhaps the most insidious problem with pancuronium bromide
2 is that it creates a chemical veil over the execution process in the following respects:

3 (a) First, by completely paralyzing the inmate, pancuronium bromide masks
4 the normal physical parameters that an anesthesiologist or surgeon would rely upon to determine
5 if a patient is completely unconscious and within a proper "surgical plane of anesthesia."

6 (b) Second, by completely paralyzing the prisoner, pancuronium bromide pre-
7 vents observers (including the prisoner's attorney, the press, the victim's family members, the in-
8 mate's family members and representatives of the public) from seeing if the condemned prisoner
9 is experiencing any pain or suffering from the lethal injection.

10 (c) Third, because pancuronium bromide is an invisible chemical veil and not
11 a physical veil like a blanket or hood that is easily identifiable, the use of pancuronium bromide
12 in lethal injection creates a double veil. It disguises the fact that there is a disguise.

13 The use of pancuronium in California's execution protocol effectively nullifies the
14 ability of witnesses to discern whether the condemned prisoner is experiencing a peaceful or ago-
15 nizing death. Regardless of the experience of the condemned prisoner, whether he or she is
16 deeply unconscious or experiencing the excruciating pain of suffocation, paralysis, and potassium
17 injection, he or she will appear to witnesses to be serene and peaceful due to the relaxation and
18 immobilization of the facial and other skeletal muscles. (Heath Decl. ¶ 15; Declaration of Dr.
19 Cory Weinstein ["Weinstein Decl."] ¶ 6(c).)

20 Under Procedure No. 770 here in California, if the process is performed without
21 error or complication and if the proper dosages are administered, death is caused by the potassium
22 chloride, not by the pancuronium bromide. (Grele ¶ 6, Ex. E [TRT at 118].) Pancuronium bro-
23 mide does not affect consciousness, so it does not serve to make the process more humane. In
24 fact, the use of pancuronium bromide creates the real and unreasonable risk of causing an excru-
25 ciatingly inhumane execution when, for any number of reasons (explained below), the sodium
26 pentothal fails to have its intended effect.

27 The problem with the use of pancuronium, and the risks attendanr to its use, has
28 resulted in revision of the New Jersey lethal injection protocol to omit its use entirely. (Heath

Decl. ¶ 9.) It is completely unnecessary to the process. (*Id.* ¶ 17.)

b. Sodium Pentothal Creates a Serious Risk of Inadequate Anesthesia

Sodium pentothal is the first drug of the sequence pursuant to Procedure No. 770. It is an "ultra short-acting" barbiturate. (Heath Decl. ¶ 18.) Its purpose in the procedure is to render the condemned inmate unconscious. (Grele Decl. ¶ 6, Ex. E [TRT at 291].) If the procedures are performed as intended, without any complications or errors, death would be caused by the third drug, potassium chloride, which would stop the functioning of the heart before the sodium pentothal would have its lethal effect. (*Id.* [TRT at 118].)

In medical practice, sodium pentothal is used only as an "induction" anesthetic. (*Id.* [TRT at 59-60].) It renders the patient unconscious very quickly, and its effect wears off in a matter of minutes. (*Id.* [TRT at 47].) There are very few drugs that have a shorter duration of action. (*Id.* [TRT at 107].) In surgery, the injection of sodium pentothal will be followed almost immediately, subject to the monitoring of the patient, with administration of another, longer-lasting anesthetic.

Dr. Heath explains that when anesthesiologists use sodium pentothal, they do so for the purposes of temporarily anesthetizing patients for sufficient time to intubate the trachea and institute mechanical support of ventilation and respiration. Once this has been achieved, additional drugs are administered to maintain a "surgical depth" or "surgical plane" of anesthesia (i.e., a level deep enough to ensure that a surgical patient feels no pain and is unconscious for the duration of the surgical procedure). The medical utility of the sodium pentothal derives from its ultra-short acting properties: if unanticipated obstacles hinder or prevent successful intubation, patients will quickly regain consciousness and will resume ventilation and respiration on their own. (Heath Decl. ¶¶ 19-20.)

Dr. Heath and Dr. Geiser both make clear that sodium pentothal would not be used to maintain the patient in a surgical plane of anesthesia for purposes of performing any kind of surgical procedure. (Heath Decl. ¶ 20.) Dr. Heath adds that it is unnecessary and risky to use a short-acting anesthesia in this fashion. (*Id.*)

1 Adding to the risk of inadequate anesthesia is the fact that sodium pentothal is very
2 unstable. (Grele Decl. ¶ 6, Ex. E [TRT at 58, 109].) It is an unusual drug in that it comes from
3 the manufacturer in powder form and must be mixed by the anesthesiologist into a solution (a
4 fluid form) before use. (*Id.*) Sodium pentothal in solution has an extremely short shelf life and
5 will begin to lose its potency within the initial 24 hour period after it is mixed. (*Id.*) Moreover, if
6 the solution of sodium pentothal comes into contact with another chemical, such as pancuronium
7 bromide, the mixture of the two will cause the sodium pentothal immediately to precipitate out of
8 solution. (Heath Decl. ¶ 20.) Consequently, it is important to maintain the purity of the drug dur-
9 ing administration. This explains the need for an injection of saline solution between the sodium
10 pentothal and the pancuronium bromide. These factors are significant in the risk of the inmate
11 not being properly anesthetized, especially since no one checks that the inmate is unconscious
12 before the second drug is administered. (*Id.*)

13 Differences in a person's body composition (size, weight, and drug tolerance) and
14 any medications he or she may have taken mean some prisoners may need a higher concentration
15 of sodium pentothal than others to induce a loss of consciousness. (Heath Decl. ¶ 21; Weinstein
16 Decl. ¶ 6(a).) California's failure to account for each inmate's physiological composition creates
17 a high probability that the inmate will be conscious when the other chemicals are administered
18 causing the inmate to suffer an excruciatingly painful death. There is a reasonable probability
19 that some of the complications attendant to the execution of William Bonin were the result of this
20 failure. (Heath Decl. ¶ 25.)

21 In addition, Procedure No. 770 allows for the inmate to ingest Valium prior to the
22 administration of sodium pentothal. This is concerning because Valium is known to alter the sen-
23 sitivity of the brain to sedative drugs such as and including sodium pentothal, which will signifi-
24 cantly amplify the risk of inhumane pain and suffering should anything go wrong with the
25 administration of the sodium pentothal. The failure of Procedure No. 770 properly to define the
26 amount of Valium, or to consider the inmate's drug history in its administration, prior to the ap-
27 plication of sodium pentothal is not a medically acceptable procedure and unnecessarily raises the
28 risk that the inmate will suffer excruciating torment. (Heath Decl. ¶ 22.)

1 Procedure No. 770 calls for a five (5) gram dose of sodium pentothal administered
2 in a single injection from a single syringe. By contrast, the original design of the lethal injection
3 protocol called for the **continuous** intravenous administration of an ultrashort-acting barbiturate.
4 The central elements of the lethal-injection procedure used in California is similar to the one
5 adopted many years ago in Oklahoma (which, it appears, many states used as a model without
6 substantive independent research). Oklahoma, however, requires the "continuous intravenous
7 administration of an ultrashort-acting barbiturate." Oklahoma Statutes, Title 22 Criminal Proce-
8 dure, Chapter 17 Part 1014 A. California's protocol eliminates this "continuous" requirement.
9 The use of a continuous administration of the ultrashort-acting barbiturate is essential to ensure
10 continued and sustained unconsciousness during the administration of pancuronium and potas-
11 sium chloride. The failure to require a continuous infusion of sodium pentothal places the con-
12 demned inmate at a needless and significant risk for the conscious experience of paralysis during
13 the excruciating pain of both suffocation and the intravenous injection of potassium chloride.
14 (Heath Decl. ¶ 23.) Dr. Heath explains why potassium chloride would cause extreme pain if ad-
15 ministered to a patient who is not properly anesthetized: "[I]t would be agonizing. Potassium
16 activates all the nerve fibers inside the vein and the veins have many nerve fibers inside them. So
17 it would basically deliver the maximum amount of pain the veins can deliver which is a lot."
18 (Grele Decl. ¶ 6, Ex. E [TRT at 117].)

19 This risk has been realized in at least one, and possibly three California executions.
20 The most recent of these, Stephen Anderson's, is graphically described in the Declaration of
21 Margo Rocconi ("Rocconi Declaration"). (Grele Decl. ¶ 3, Ex. B.) The description strongly indi-
22 cates that the sodium pentothal did not have the desired and necessary effect of sedating Mr.
23 Anderson sufficiently. The intermittent and irregular heaving is consistent with the struggle to
24 breathe in some state of consciousness. The length of this heaving and gasping is also highly un-
25 usual if the sodium pentothal is lethally administered as maintained by CDC. (Heath Decl. ¶ 24.)
26 In the executions of William Bonin and Jatrun Siripongs, similar observations were made. (Grele
27 Decl. ¶ 4, Ex. C.)

28 The ultimate risk with sodium pentothal is that an adequate dose of the drug will

1 not enter the inmate's bloodstream, thereby leaving the inmate conscious to experience suffoca-
2 tion from pancuronium bromide and cardiac arrest from potassium. Under defendants' proce-
3 dures, this risk is present at several stages. First, contrary to regulatory requirements, Procedure
4 No. 770 contains no provisions for how sodium pentothal or any of the drugs are to be handled,
5 mixed, administered, stored, or accounted for. (Heath Decl. ¶ 27; Weinstein Decl. ¶¶ 3-7.) Sec-
6 ond, for the reasons discussed above, both Dr. Geiser and Dr. Heath testified that they would
7 never administer pancuronium bromide without first being certain that the patient (or inmate) is
8 under a surgical plane of anesthesia. (Grele Decl. ¶ 6, Ex. E [TRT at 64-66, 116].) This requires
9 some kind of monitoring after the administration of the anesthetic and before the injection of pan-
10 curonium bromide.

11 For all of the above reasons, a single dosage of sodium pentothal is not a proper
12 anesthetic for use in lethal injection as described in the California procedure. Indeed, the AVMA
13 standards for euthanasia make absolutely no provision for the use of sodium pentothal for any
14 purpose in the euthanasia of animals. (See *id.* [TRT at 59-60, 71-73; *id.* ¶¶ 11, 12, Exs. J, K.])
15 Dr. Geiser testified that he would not use sodium pentothal in euthanasia either by itself or in
16 combination with any other drugs. (*Id.* ¶ 6, Ex. E [TRT at 59-60].)

17 **c. The Lack of Sufficient Guidance in Procedure 770**
18 **Creates a Substantial Risk of Unnecessary Pain**

19 The risk of inflicting severe and unnecessary pain and suffering upon Mr. Cooper
20 in the lethal injection process is particularly grave in California because of the vague procedures
21 and protocols in Procedure No. 770. These procedures and protocols fail to include safeguards
22 regarding the manner in which the execution is to be carried out, fail to establish the minimum
23 qualifications and expertise required of the personnel performing the crucial tasks in the lethal
24 injection procedure, and fail to establish appropriate criteria and standards that these personnel
25 must rely upon in exercising their discretion during the lethal injection procedures. Perhaps most
26 importantly, there are no apparent answers to critical questions governing a number of crucial
27 tasks and procedures in the lethal injection procedure such as:

28 • **The minimum qualifications and expertise required for the**

different personnel performing the tasks involved in the lethal injection procedure after the catheter is inserted;

- The methods for obtaining, storing, mixing, and appropriately labeling the drugs, the minimum qualifications and expertise required for the person who will determine the concentration and dosage of each drug to give, and the criteria that shall be used in exercising this discretion;
- The manner in which the IV tubing, three-way valve, saline solution and other apparatus shall be modified or fixed in the event it is malfunctioning during the execution process, the minimum qualifications and expertise required of the person who shall have the discretion to decide to attempt such action, and the criteria that shall be used in exercising this discretion;
- The manner in which the heart monitoring system shall be modified or fixed in the event it is malfunctioning during the execution process, the minimum qualifications and expertise required of the person who shall have the discretion to decide to attempt such action, and the criteria that shall be used in exercising this discretion;
- The manner in which the IV catheters shall be inserted into the condemned prisoner, the minimum qualifications and expertise required of the person who shall have the discretion to decide to attempt such action, and the criteria that shall be used in exercising this discretion;
- The manner in which condition of the condemned prisoner will be monitored to confirm that proceeding to the next procedure would not inflict severe and unnecessary pain and suffering on the condemned prisoner;

Without guidance from medical professionals or providing sufficient guidance for carrying out lethal injection executions, Procedure No. 770 creates the unconstitutional risk of painful executions and botched procedures. (Heath Decl. ¶ 24-25.) This is not a speculative risk – it is demonstrated in the difficulties seen in 1996 during the Bonin execution and in 2002 during the Anderson execution.

Perhaps the most glaring failure of Procedure No. 770 is the failure to ensure adequate procedures regarding the administration of the drugs. There is no guidance or protocol that determines the timing of administration of these chemicals. (Heath Decl. ¶ 26.)

Procedure No. 770 fails to account for the individual inmate's differing body weights, tolerances anesthetics, allergic reactions, past exposure to alcohol and addictive drugs as

1 well as other factors, such as a condemned person's stress or fear during the execution and resul-
2 tant release of adrenalin, some prisoners may require a higher dosage of sodium pentothal to lose
3 consciousness in sufficient time to limit the pain and suffering experienced. (Weinstein Decl. ¶
4 6(b).) The procedure actually contains elements such as Valium ingestion that can and will inter-
5 fere with the ability of the sedative agent to render the inmate unconscious. (Heath Decl. ¶ 22.)

6 The failure to ensure adequate application of the sedative drug can and is likely to
7 cause extreme pain and suffering from both subsequent drugs. As Dr. Weinstein indicates, if the
8 drugs are not administered properly or if the personnel are not adequately trained to administer
9 the lethal substances serious consequences will follow. For example, if mistakes are made re-
10 garding the order in which the drugs are injected, the prisoner would suffer unnecessary and se-
11 vere pain because he would not be properly anesthetized.

12 If Mr. Cooper is given sodium pentothal followed by pancuronium bromide and
13 regains consciousness before the potassium chloride takes effect, he will be unable to move or
14 communicate in any way while experiencing excruciating pain. As the potassium chloride is ad-
15 ministered, he will experience an excruciating burning sensation in his vein, like the sensation of
16 a hot poker being inserted into the arm and traveling up the arm and spreading across the chest
17 until it reaches the heart, where it will cause the heart to stop. (Weinstein Decl. ¶ 6(c).)

18 If the sodium pentothal, pancuronium bromide and potassium chloride are admin-
19 istered in the sequence described and Mr. Cooper's heart fibrillates but does not stop, he will
20 wake up but be unable to breathe. The initial dose of sodium pentothal could sensitize Mr. Co-
21 per's pharynx, causing him to choke, gag, and vomit. He would be at risk of aspirating his vomi-
22 tus or swallowing his tongue and suffocating. (*Id.* ¶ 6(a).)

23 Furthermore, the procedures provide for a saline injection between the pan-
24 curonium bromide and the potassium chloride. Although a saline flush is necessary between the
25 first two drugs – the sodium pentothal and the pancuronium bromide – to avoid precipitation or
26 crystallization of the pentothal, there is no need for a saline flush between the second and third
27 drugs. This creates unnecessary complexity that increases the chance for error. (Grele Decl. ¶ 6,
28 Ex. E [TRT at 129].)

1 The California CDC procedures provide for virtually no monitoring of the flow of
2 the fluids into the prisoner's vein. (Weinstein Decl. ¶ 9.) Proper monitoring requires a clear view
3 of the IV site and often will require "palpation" or touch of the site to check for skin temperature
4 and firmness of the surrounding tissue. (Grele Decl. ¶ 6, Ex. E [TRT at 135-36].) Infiltration or
5 some kind of diversion of the fluid away from the vein could occur without being detectable by
6 the trained naked eye just through observation. (*Id.* [TRT at 136].) There is no indication that the
7 executioner or the Warden, the persons present during the actual injection of the drugs, is trained
8 in these areas; nor is there any indication that they perform any kind of monitoring other than
9 crude visual observation.

10 Procedure 770 calls for a modification of the use of the "Y" site injection that is
11 not medically approved, to the extent it can be determined. (Heath Decl. 29) In fact, the latering
12 of established medical procedures, and the process for review and amendments of the protocol is
13 another area of concern as it can lead to ad hoc administration and error. (Heath Decl. 30)

14 Further, there is no consideration of the need for modified procedures in 770 in the
15 case of an emergency or difficulty. (Heath Decl. 32) Thus, it is likely that California will use a
16 "cut-down" surgical procedure to open up Mr. Cooper in the event it cannot find a vein sufficient
17 to administer these chemicals. The protocols don't even require medical training or experience in
18 this gruesome procedure that is even more difficult and likely to result in error. (Heath Decl. 33)

19 Regardless of the manner in which "execution protocols" are drafted, the process
20 of the lethal injection process, from start to finish, is complex and is fraught with the possibility
21 of error, as all three recent wardens administering the protocol in California have admitted. (See
22 Grele Decl. ¶¶ 8-10, Exs. G, H, and I.) The administration of a complex series of drugs by
23 non-medical personnel has created numerous, and horrific, mistakes and errors in California and
24 other states. (Heath Decl. ¶ 31; Grele Decl. ¶ 13, Ex. L.) These mistakes include "blow-outs,"
25 prison personnel spending almost two hours probing and sticking the condemned prisoner with
26 various intravenous needles in efforts to start an IV catheter, improperly inserted catheters (no
27 doubt attributable to the fact that, for ethical reasons, physicians are not involved in the process);
28 kinks in the IV tubing or other problems restricting the rate at which the drugs flow into the con-

1 demned prisoner, and executions in which the condemned prisoner appeared to be conscious dur-
2 ing the course of the execution and made unusual verbal noises or the condemned person's body
3 jerked violently and moved against the restraint straps during the execution.

4 **d. California Has Inflicted Excruciating and Unneces-**
5 **sary Pain in Previous Lethal Injection Executions**

6 On February 23, 1996, William Bonin became the first person executed by means
7 of lethal injection in California. It took the execution staff 27 minutes to insert the IV tube and
8 begin administration of the lethal chemicals. (Grele Decl. ¶ 4, Ex. C.). The Bonin log notes heat
9 sensitivity of the EKG monitor indicating a possible equipment problem. (Weinstein Decl. ¶ 8.)
10 In addition, Bonin's records indicate irregularities in his heart and breathing monitoring. The re-
11 cords appear altered without appropriate verification, so they are difficult to interpret. Mr. Bonin
12 may have been on medications for which the procedure did not account. (Heath Dec. ¶ 25; Grele
13 Decl. ¶ 4, Ex. C.)

14 On February 9, 1999, Jaturun Siripongs, executed by lethal injection in California,
15 was pronounced dead 15 minutes after being injected. According to prison officials, Siripongs
16 declined to take a sedative, "an option offered to all condemned inmates in the moments before
17 they die." After the injection of 50 cc of pancuronium bromide, "Siripongs' head tilted back and
18 he opened his mouth widely, gasping for air and, to all appearances, yawning. His diaphragm
19 continued to heave intermittently until near the end." (Grele Decl. ¶ 14, Ex. M.) (Michael Dou-
20 gan, Eerie echoes rattle death chamber; Witnesses silent, but storm's fury shakes San Quentin,
21 The San Francisco Examiner (February 9, 1999).) "Witnesses said his body twitched several
22 times as the poisons worked through his body. At one point, his chest heaved and he seemed to
23 gasp for air. His few more breaths were increasingly shallow until they stopped and he lay still."
24 (*Id.*) (Larry D. Hatfield, Siripongs put to death; Pope's plea ignored as double-murderer lethally
25 injected at San Quentin, The San Francisco Examiner (February 9, 1999).) A similar and graphic
26 example of this was present for the Bonin execution.

27 **e. California Most Recent Execution**

28 On January 29, 2002, execution of Stephen Wayne Anderson took almost a half an

1 hour to complete. After the poisons began to enter Anderson's veins and he was rendered uncon-
2 scious, "his stomach heaved up and down dozens of times for about four minutes before he died –
3 unusual, because the chests of inmates being lethally injected typically heave once or twice, and
4 then fall still." (*Id.*) (Kevin Fagan, Foes of execution criticize slow death / Proponents say that
5 worry is unwarranted, The San Francisco Chronicle (January 30, 2002).) After the execution be-
6 gan, Anderson's eyes blinked repeatedly, and his right foot twitched. "His breathing became
7 strained and heavy, his chest heaving every five or six seconds. The blood drained from his face,
8 [and] his head rolled to the right. . . ." (*Id.*) (Scott Gold, The State Death Row Inmate Was Calm,
9 Alone to End Execution: Stephen Wayne Anderson showed no anxiety, sought no comfort, offi-
10 cials say. He said his extensive prison writings would speak for him, LA Times, B7 (January 30,
11 2002).) (Grele Decl. ¶ 3, Ex. B.)

12 2. **California Lethal Injection Procedures Do Not Comport**
13 **With Contemporary Norms of Society.**

14 If applied to animals, Procedure No. 770 would violate the AVMA standards for
15 euthanasia in veterinary medicine, which are applicable throughout the country. Since 1981, at
16 least nineteen states have enacted statutes that preclude the use of a sedative in conjunction with a
17 neuromuscular blocking agent in the context of pet euthanasia.⁵ In 2000, the leading professional
18 association of veterinarians promulgated guidelines for euthanasia that preclude the practice.
19 *2000 Report of the American Veterinarian Medical Association Panel on Euthanasia*, 218 Journal
20 of the American Veterinary Medical Association ("AVMA"), 669, 680 (2001). The AVMA has
21 also stressed that only trained personnel and those knowledgeable in anesthetic techniques should
22 administer potassium chloride in conjunction with any anesthesia. *Id.* at 681. Indeed, the lethal
23 injection protocol, in providing for the use of the neuromuscular blocking agent Pavulon, which is
24 strictly prohibited for use in euthanizing non-livestock animals, violates California statutory and

25 ⁵ See, e.g., Florida, Fla. Stat. §§ 828.058 and 828.065 (enacted 1984); Georgia, Ga.
26 Code Ann. § 4-11-5.1 (enacted in 1990); Maine, Me. Rev. Sta. Ann., Tit. 17 § 1044 (enacted
27 1987); Maryland, Md. Code Ann., Criminal Law § 10-611 (enacted 2002); Massachusetts, Mass.
28 Gen. Laws § 140:151A (enacted in 1985); New Jersey, N.J.S.A. § 4:22-19.3 (enacted in 1987);
New York, N.Y. Agric. & Mkts. § 374 (enacted in 1987); Oklahoma, Okla. Stat., Tit. 4, § 501
(enacted in 1981); Tennessee, Tenn. Code Ann. § 44-17-303 (enacted in 2001).

1 regulatory law prohibiting cruelty to animals. See Cal. Penal Code §§ 597 and 599b; Bus. & Prof.
2 Code §§ 4800-4917 (the Veterinary Medicine Practice Act); Office of the Attorney General of the
3 State of California, Opinion 01-103 (January 2, 2002)) (adopting the *1993 Report of the American*
4 *Veterinary Medical Association Panel of Euthanasia* as the proper standard in California for
5 measuring whether an animal euthanasia procedure causes "unnecessary or unjustifiable physical
6 pain or suffering" within the meaning of Penal Code Section 599b).

7 Under any view, our "evolving standards of decency" require that execution pro-
8 cedures conform at least to the contemporary norms and standards for the treatment of animals.
9 The question of what might constitute minimal contemporary standards of decency also must be
10 considered in light of the availability of alternatives. With little effort, defendants can develop a
11 safe, simple, and properly regulated protocol that would involve a single injection of pentobarbi-
12 tal, the most commonly used method in the euthanasia of domesticated animals. See Bus. & Prof.
13 Code § 4827(d).

14 The United States Supreme Court has made clear that the principle of human dig-
15 nity is central to the Eighth Amendment cruel and unusual punishments clause, and that this prin-
16 ciple of dignity goes beyond the mere infliction of physical pain or suffering. Human dignity can
17 be offended in unconstitutional ways through unacceptable stigmatization of an inmate or through
18 other means that may not involve excessive pain or suffering. In the seminal case of *Furman*, 408
19 U.S. 238, Justice Brennan explained this principle as follows:

20 The State, even as it punishes, must treat its members with respect
21 for their intrinsic worth as human beings. A punishment is "cruel
22 and unusual," therefore, if it does not comport with human dignity
23

24 The primary principle [behind the Eighth Amendment] is that a
25 punishment must not be so severe as to be degrading to the dignity
26 of human beings. Pain, certainly, may be a factor in the judgment
27 Yet the Framers also knew "that there could be exercises of
28 cruelty by laws other than those which inflicted bodily pain or muti-
lation." [citing *Weems v. United States*]. Even though "[t]here may
be involved no physical mistreatment, no primitive torture," *Trop v.*
Dulles, [], 356 U.S. at 101, 78 S.Ct. at 598, severe mental pain may
be inherent in the infliction of a particular punishment. See *Weems*
v. United States, *supra*, 217 U.S. at 366 The true significance
of [a variety of cruel and unusual punishments] is that they treat
members of the human race as nonhumans, as objects to be toyed

1 with and discarded.

2 408 U.S. at 271-73, 92 S.Ct. at 2742-43.

3 **IV. CONCLUSION**

4 Kevin Cooper, through this action, does not seek to overturn his conviction and
5 sentence. By its terms, he is demanding the protection of the civil rights to which he is entitled
6 under the law. While the enforcement and punishment of criminal acts is undisputedly an impor-
7 tant and legitimate public concern, such goals must be achieved in a manner consistent with the
8 protections and procedures derived from the Constitution. To avoid the risk that Cooper's execu-
9 tion will result in needless suffering and pain, thereby denying him the protection afforded under
10 the Eighth and Fourteenth Amendments to the Constitution, he is entitled to redress under 42
11 U.S.C. Section 1983. Accordingly, Cooper requests that the Court issue a temporary, prelimi-
12 nary, and permanent injunction preventing defendants from executing him by means of lethal in-
13 jection, under the method and the procedures currently in effect in the State of California.

14 Dated: February 1, 2004.
